Profile

Angular Developer with **4.5+ years of experience** in designing and developing high-performance web applications, including **1 year and 6 months of experience at Tata Technologies**. Proficient in **Angular v16 to v22, RxJS, NGXS, Node.js, and MongoDB**, with a strong focus on UI performance optimization, state management, and reusable component architecture. Seeking an opportunity to leverage technical expertise to build scalable, efficient, and maintainable applications.

Professional Experience

Angular Developer | Tata Technologies Pune, (MH) **April 2025 – Present**

Full Stack Developer | Nikiphoros Chandrapur, (MH) **January 2022 – March 2025** | 3 Yrs 3 M.

Education

Bachelor of Engineering (Year-2018)
Smt. Radhikatai Pandav college of Engineering, Nagpur
Rashtrasant Tukadoji Maharaj Nagpur University

Skills

Frontend Frameworks: — Angular (16+), React.js, Next.js, React Native, Ionic | **State Management & Reactive Programming:** Signals,RxJS, ,NGXS | **UI Libraries & CSS Frameworks:** PrimeNG, Angular Material, Bootstrap 5 | **Data Visualization:** Apache ECharts | **Web Technologies:** HTML5, CSS3, JavaScript, TypeScript

Backend: — Node.js | Express.js | REST API | JWT | Sequelize | Mongoose | Python | django

Databases: — MongoDB | MySQL

Tools: — Git | GitLab | GitHub

AI-Assisted Development & Productivity Tools: — ChatGPT, Claude, Cursor AI, GitHub Copilot

Projects:

1) Project Name - Funding Dashboard Module , *Client Name- Tata Motors*
Developed a financial dashboard to monitor dealer profitability, retail offtake, funding performance, and other key business metrics, enabling data-driven analysis through interactive charts, pivot tables, and dynamic reports.

2) Project Name: Navodaya education , *Client Name: National Talent Organization,Bhopal*
Developed an online platform for Navodaya Education to streamline the management and participation in the Annual Olympiad Exam. Implemented role-based access for Admins, Students, and Schools, enabling secure and efficient user interactions.

3) Project Name: Industry Module , *Client Name: Solar Industries,Nagpur*
Designed and developed a digital diary application for a manufacturing plant to streamline activity tracking and inspections. Implemented log sheets and check sheets for structured record-keeping, enabling users with various roles to review and approve entries, ensuring a systematic and efficient data collection process.

4) Project Name: Attendance App , *Client Name: Idemi,Mumbai*
Developed an Attendance Management System for contractual employees to automate attendance tracking and reduce manual errors. Implemented role-based access, real-time status updates, and data validation to enhance accuracy and efficiency.

Responsibilities

Tata Technologies — Senior Solution Developer

- **Developed interactive financial dashboards** using Angular, Apache ECharts, and dynamic pivot tables to visualize financial data, trends, and performance metrics.
- **Built dynamic tables and interactive charts**, including line charts and graphs, with data-driven rendering, sorting, filtering, and pagination.
- **Resolved security vulnerabilities** identified by Checkmarx static code analysis and addressed VAPT findings by implementing recommended security fixes and validating remediations.
- **Optimized UI performance** by improving component rendering, API response handling, and data visualization for large financial datasets.
- **Integrated REST APIs and developed reusable Angular components** to support scalable financial reporting features and maintainable application architecture.
- **Deployed Angular applications using OpenShift**, supporting application releases and ensuring smooth deployment across the target environments.

Nikiphoros — Full Stack Developer

- **Developed responsive user interfaces** using Angular, Bootstrap 5, PrimeNG, and Angular directives to deliver consistent user experiences.
- **Improved application performance** through lazy loading, code splitting, and optimized component loading.
- **Implemented scalable application architecture** with modular components, efficient routing, and state management using NGXS.
- **Integrated REST APIs and backend services** using Node.js to support application functionality and efficient data exchange.
- **Implemented role-based authentication using JWT** and resolved application bugs to improve security, stability, and UI responsiveness.
